

A garden centre has asked you to create a new lamp that is inspired by nature to add to their product range.

The product must have the following features:

- At least three lights.
- An on/off switch
- The light must be adjustable
- The product must be in colour.
- The product should work in all weathers (including rain and snow)
- The product must be free standing or hang from the wall or ceiling.
- The product must be remote controlled.
- The product must be suitable for sale in a garden centre.
- The product should include plastic and metal in some way.
- The product must have a power source (either battery or power cord)
- The product must use the images opposite as inspiration.

All drawings must be in colour and must be labelled to show all the features listed above.
